Group Art Unit:

2613

Filed:

February 16, 2001

Docket No.:

12808.13USI1

Title:

CAPSULE

CERTIFICATE UNDER 37 CFR 1.8: The undersigned hereby certifies that this correspondence is being deposited in the United States Postal Service, as first class mail, with sufficient postage, in an envelope addressed to: Commissioner for Patents, Washington, D.C. 20231 on January

Name: Karen R. Nejedly

AMENDMENT AND RESPONSE

Commissioner for Patents Washington, D.C. 20231

Dear Sir:

In the Claims

Kindly amend claim 27 as follows:

The system according to claim 26, wherein said light source produces at (Amended) 27. least two alternating beams of light, wherein each of said at least two alternating beams of light, [each said alternating beams of light] is characterized as being in a different range of wavelengths.

Remarks

In the Office Action, claims 1-19, 22-50, 52 and 71-72 were rejected under 35 U.S.C. § 103 based on the cited art. Claims 1-19, 22-25 and 71-72 were rejected as being unpatentable over Okada et al. Regarding claim 1, the Examiner states that according to Okada et al., the sensor assembly detects a stereoscopic image. However, the system according to Okada et al. is structured differently than that of the claimed invention and further produces stereoscopic images in a manner different than the system recited in claim 1 of the application.
